## JavaScript Developer Assignment

Create a shopify app by signing up for <https://shopify.dev/> and build a UI interface mockup based on some examples shared.

You will need to generate a shopify app based on best design and UI principles.

Attached below are a few examples that can serve as reference, they do not need to be exact.

What we are looking for is

- at least 2 scorecards, one graph and one table with two filters. One for date range and the other can be any other dimension that is used.

[Example 1](#)

[Example 2](#)

[Example 3](#)

[Example 4](#)

[Example 5](#)

**Please note** that we don't need a full scale implementation, please use mock data, we just need to evaluate your front end design skills and the build should not take more than 20 hours of effort.

You do not need to stick with the examples, you have complete freedom to design as long as the criteria mentioned above is adhered to

It is completely acceptable to choose a minimalistic design as long as the UI design is well done and functional.
